

Cone Crusher

CCS OSTEM PROJECTS PVT. LTD.
"COMPLETE CUSTOMER SATISFACTION"

Cone Crushers

"CCS OSTEM" Cone Crushers are characterised by various features to ensure superior performance in terms of capacity, operating costs, operator friendliness as well as cubical output product.

Our Cone Crushers incorporate latest technology of closed side setting by Hydraulic Arrangement as well as Monitoring System to ensure smooth flow of lubricating oil at the right temperature and pressure range.

As is the working at "CCS OSTEM", all components are of sturdy design, made from the best raw material or procured from top vendors. For high precision, all important components are CNC machined.

Rigorous stage wise inspection till final assembly and in house trials before shipment has made us proud of the spectacular performance of the "CCS OSTEM" Cone Crusher.

What makes our Cone Crusher unique !!!

- Sturdy Gear Drive Mechanism with arrangement to conveniently adjust back lash
- Metallurgically advanced Eccentric Bush Design
- Large feed opening and Steep Head Angle to ensure High Reduction Ratio
- Sophisticated Hydraulic System for CSS Adjustment
- Advanced Monitoring System for Lubricating Oil motion, temperature and pressure
- Automatic cutoff in case of any eventuality
- High Grade Alloy Steel Liners
- CNC machined critical components for high precision

"CCS OSTEM" Cone Crushers, with their robust design and backed by our prompt and premium quality service, prove to be the ideal choice at the secondary or tertiary stage of the Crushing & Screening Plant - for production of cubical aggregate.

Crushing Capacities at different C.S.S.*

Model	Power	Closed Side Setting (C.S.S.)				
		15 mm	20 mm	25 mm	30 mm	35 mm
CC-100	90 KW	55-65	65-75	75-90	90-110	
CC-200	160 KW	115-135	135-160	160-185	185-215	215-235

* : Crushing Capacity in Metric Tonnes per Hour. Indicated capacities based on material bulk density of 1.6T/m³. Actual capacity may vary depending on material characteristics
